Complete all the necessary fields.

* indicates a required field

Proposal Title *

A proposal must have a short, specific presentation title (containing no abbreviations) that indicates the nature of the presentation.

ITK-SNAP as an Agent-Callable Tool: Expert Human Correction as a Resumable, Audited Pipeline Step

97 characters (Max 300 characters)

14 words (Max 30 words)

Current State of Readiness: Where is this MVP in its lifecycle? *

-- Select One --

The Demo: How do you plan to demonstrate this at CAIMI26? *

-- Select One --

Briefly describe what attendees will see during your demo. *

Problem & Motivation: What clinical or operational problem does your MVP address? *

Briefly describe the specific pain point or unmet need that motivated you to build this. No hypothesis required; just the real-world problem you're trying to solve.

Submission Title: ITK-SNAP as an Agent-Callable Tool: Expert Human Correction as a Resumable, Audited Pipeline Step 0 words (Max 250 words)

What You Built: Describe your MVP, tool, or workflow in plain language *

What does it do? What inputs does it take and what does it produce? You don't need a polished product. Rough edges are welcome here

0 characters

0 words (Max 250 words)

Tech Stack & Development Approach: What tools, frameworks, or methods did you use to build it? *

e.g., Python, LLM APIs, Claude terminal, Epic integration, PowerScribe API, a weekend of vibe coding, etc. Be specific and honest. This is a learning community.

0 characters

0 words (Max 250 words)

Validation & Evidence: Have you done any informal testing or validation? If so, what did you find?

This is optional — we want to see MVPs at all stages. Share what you have, including failures or surprising results.

0 characters

0 words (Max 250 words)

Feedback You're Seeking: What specific feedback, help, or collaboration are you hoping to get from the CAIMI26 community? *

This is a two-way street — tell us what would make this session valuable for you. Are you stuck on deployment? Looking for a clinical champion? Trying to validate a use case?)

0 characters

0 words (Max 250 words)

Known Limitations & Honest Failures: What isn't working yet, or what have you already tried that failed?

*

This is one of the most valuable things you can share. The community learns more from honest struggles than polished success stories. Are there specific capabilities, APIs, or data access that would be difficult or impossible to achieve without vendor support?

0 characters

0 words (Max 250 words)

Potential for Impact: If this MVP were fully developed and deployed, who would benefit and how? *

Think broadly — patients, radiologists, trainees, hospital systems, etc.
